

## pe foam tapes

*solution for bonding, sealing, cushioning, protection, mounting & fixing*

- High performance double-sided foam tapes for various applications and industries
- Can be used for gasketing and weatherstripping; resisting moisture, chemicals and most solvents
- Conformable and easy-peel for fast and reliable application

Our versatile double-sided foam tapes cater for various industries, ranging from advertising and graphics industry to automotive, building and construction industries. *FIRMFIX*® high performance PE foam tapes are made to bond objects and parts, fixing and mounting them strongly for the required applications.

*FIRMFIX*® PE foam tapes are made from polyethylene (PE) foams coated with pressure sensitive adhesive on both sides. Different types of PE foam tapes are available for different performance, depending on the required applications. Our PE foam tapes selection include:

- *FIRMFIX*® PE 145 foam tape
- *FIRMFIX*® PE 142 foam tape
- *FIRMFIX*® PE 141 foam tape

### FIRMFIX® PE 145

1mm-thick black PE (polyethylene) foam with blue liner coated with acrylic adhesive on both sides.

An automotive grade double-sided foam tape that is high performance and tough in the outdoor environment which makes it useful for mounting and installation of parts in the automotive industry.

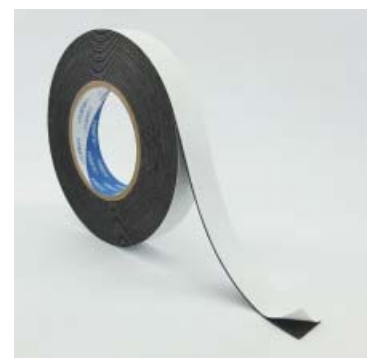

### FIRMFIX® PE 142

1mm-thick white PE (polyethylene) foam with white liner coated with acrylic adhesive on both sides.

A versatile general-purpose double-sided foam tape for various usage such as mounting and installation of parts. This tape is especially useful in the graphics industry where white foam is used frequently over the black.

### FIRMFIX® PE 141

1mm-thick black PE (polyethylene) foam with white liner coated with acrylic adhesive on both sides.

A versatile general-purpose double-sided foam tape for various usage such as fixing, bonding, mounting and installation of parts.
